Because AutoCAD is proprietary, the way that the program works internally is not necessarily understood by the consumer. A non-proprietary solution is Acrobat's Mobile, desktop and web apps. In the early years, AutoCAD ran on Apple II computers as well as other PC-compatible machines. Today it runs only on Windows. AutoCAD is the industry standard for drafting and design, and is used by almost every company in the world. AutoCAD is used to create architectural, mechanical, electrical, civil, and industrial designs. History AutoCAD was originally developed by Autodesk. Autodesk began developing AutoCAD in the late 1970s for Apple II computers as well as other PC-compatible machines. As part of the Apple II project, AutoCAD first shipped in December of 1982. Release 1.0.0 AutoCAD was first released on December 6, 1982 as a Macintosh program named "Apple Drafting". When they first released AutoCAD, it was a 32-bit program running on a 68030-based Macintosh (model 1541) with a Macintosh HD. It was the first personal computer (PC)-based drafting program, making it one of the first widely used drawing applications. The Apple Macintosh was the first widespread (non-mainframe) platform for a CAD program. The first version of AutoCAD (version 1.0.0) was only available on Macintosh. In 1983, Autodesk was approached by a company that wanted to port a version of AutoCAD for the IBM PC, and they licensed it from Autodesk. This version was bundled with the Windows version of Autocad, and its first version was 1.5.1. Release 1.5.1 In 1985, the first release of AutoCAD for IBM PC was released. With this, the software was renamed to AutoCAD, which quickly became the standard for all subsequent releases. AutoCAD was bundled with an operating system (Windows 3.1). Release 1.5.0 AutoCAD 1.5.0 was introduced in 1985. Release 1.6.0 This release of AutoCAD introduced a host of innovations, including new command names, more powerful tools, automated layers and nesting, support for nonlinear drawing (scalar) layers, transparency and an improved user

Surface of the Hard Sell "Surface of the Hard Sell" is a song recorded by American R&B singer Luther Vandross. It was released in February 1986 as the second single from his sixth studio album, *Watermark* (1986). It is Vandross' last solo hit and is considered a "classic." Background Luther Vandross had a string of hits, including the international No. 1 hit "Never Too Much" from 1984, which was a duet with Peabo Bryson. Vandross had released his fifth album, *Night Crawler*, in 1983. The title track from the album was Vandross' first single, which reached the Top Ten of the US Hot R&B/Hip-Hop Songs chart, his last to do so. At the time of his death on July 25, 2005, Vandross had fourteen Top Ten R&B hits, including four number ones. Reception Rolling Stone magazine reviewer John Mulvey described Vandross' "hard sell" as the "mixture of falsetto and soul."

Entertainment Weekly wrote that "Luther's seductive falsetto and eye-rolling guitar riff carry the song like a smoothly guided sexperience." Music video The music video for "Surface of the Hard Sell" was released at the same time as the song in the US. It begins with the title being displayed on a billboard. Vandross is seen in a black suit and tie, walking down a crowded street, in a familiar location. He stops at a large, crowded, open-air restaurant on a busy street, where he waits at the bar. He is seen talking to a white couple and is seen eating with them, when an African-American couple walks up to him. They try to introduce themselves, but Vandross is not interested in talking to them. He appears uninterested in having his picture taken with the couple, while they are taking photos. Vandross starts to leave the restaurant, but the couple blocks his way. As he walks, a car pulls up next to him, and the couple are in it. The man is in the front, and the woman is on the passenger side. Vandross gets in the car, and the couple follow. Vandross makes it home, but the African-American couple soon follow him, as they drive around Vandross' neighborhood. The African-American couple follows him to his house, and the white couple follow. In the house,
