What's new in Elden Ring:

19 Dec 2013 13:18:49 +0000 The Offering is the fifth DLC set for Dawn of Fantasy, the newly announced action RPG set in the Lands Between. In this post we'll take a look at what the DLC will add to the action, what's new about the way that the game is played, and what's new about how it plays. Silent Hara XIV Review by Casp I believe I've said something about my conflicted feelings about this game before, but I'm going to try to explain it again. I like being able to do the primal actions of slaying monsters and exploring dungeons on the battlefield, and I really enjoy the old school feel of playing my own games, but I really don't like the medieval fantasy world that Silent Hara has created and that's not just me reacting to H-Shop's translation. I actually don't like it even more than the standard third-person monster duels of many modern fighting games, which I don't play (even though I think they're fine), but I can see why they're both perfect for many people. There are a number of excellent fighting games with various settings and designed specifically for the classics console game experiences, but why can't we have our own with a modern twist? I like the option of the medieval setting and I like the style of both gameplay and story, but it just doesn't work for me. There's so many parts that work like that. Combat is fun to play, and after a few battles you can really feel the enjoyment of battle. But there is plenty of frustration in the challenges and objectives, along with enough mixed feelings and fun that I'm sure most would enjoy themselves. However, I run into the problem of getting lost in this world. I found things very enjoyable, but I was very rarely interested in anything but the next battle. The action combat and the exploration are both really fun, but nothing ever strongly holds my attention. It didn't help that everything tied into something like a magic
