If someone wants something badly enough, and has the wherewithall to put their mind to it, they'll find a way. Thanks for the help, though. (: Q: How to create a date in a specific format in a c# windows service? So what I have currently is some code that gets data from a remote server and pushes it to a database. The data is pushing fine and done correctly but one of the fields is a date (in the db it is a varchar(25)). This is a primary key and the exact format the date is required to be is yyyy-mm-dd hh 6d1f23a050
